

Dear Fifth Grade Families,

Please find your summer assignment for below.

Please complete a book review for *at least* one book, but you may certainly do more if you'd like!

We'll present our book reviews in the first few days of school. Make sure you draw a picture in the box of something that happened in your book, but remember, no spoilers!

Also, please practice math facts over the summer. A great resource is XtraMath.org, but feel free to practice however you'd like! Once the initial assessment is done, this only takes minutes a day. If you stay sharp in your reading and math facts over the summer, the transition to Fifth Grade will be a smooth one!
